

The jewish occupation governments of the West know the value of using the mental health system as a weapon against the people. During the reign of the Soviet Union mental asylums were used to destroy people who opposed Jewish communism. The Brandon Raub case shows how the Freemason patsy governments of the Jews try to intimidate White people by using bullyboy criminal tactics. Psychiatry is a Jewish creation. It has no foundation in science whatsoever, being the most fraudulent part of the entire Jewish medical establishment. A psychiatrist can do what no police officer can do, what no judge can do, what no forensic laboratory can do, which is to detain someone under the mental health act with no evidence whatsoever. Just one word is enough, or a sentence taken out of context. The psychiatrist can imprison a person on the basis of one interview and force feed him mind altering medication. The drugs themselves are dangerous and can easily destabilize a normal person, so in effect the psychiatrist is creating his own clientele.
